**Update on the Avian Influenza Situation  
(as of 16 November 2009)**

**Issue No. 228**

---

*The information summarized below is gathered from official and non official sources, which are quoted in the text. This bulletin is prepared by the UN in Cambodia in cooperation with the Royal Government of Cambodia and development partners.*

**I. Latest information on Avian Influenza in Cambodia**

**1. Country situation: Animal Health**

From 6-16 November, 2009, the animal health hotline at the National Veterinary Research Institute received three calls from Phnom Penh, Kandal and Takeo Provinces, all asking about clinical signs of AI, and transmission routes.

**2. Country situation: Human Health**

From 9-16 November, the data hotline received totally 550 calls. 541 callers were asking about the influenza A/H1N1, 7 were asking about human H5N1, 2 about the poultry and nuisance 674.

The callers were from all provinces and cities, most of them were from Phnom Penh, Kandal, Kampong Cham; and the less callers are from Preah Vihear, Stung Treng and Kep.

The callers asked about signs and symptoms of AH1N1 and the current situation in Cambodia. In case they find suspected cases where they can contact, is there a medicine to treat the A/H1N1 and who could be in the risk group? etc.

Total A/H1N1 cases in Cambodia is 394 cases and 4 death (3 female and 1 male). 12 provinces found H1N1 cases including Phnom Penh, Kandal, Takeo, Kampong Speu, Siem Reap, Svay Rieng, Battambang, Kampong Chhnang, Kampong Cham, Mondulhiri, Kampot and Prey Veng.

Anyone with flu like symptoms should stay at home, avoid crowded places and contact the Ministry of Health's Influenza Hotline: 012 489 981 or 089 669 567. Patients with influenza-like symptoms who have difficulty breathing should report to their nearest health centre for further advice.

There is currently no vaccine available for Influenza A (H1N1) and most cases do not require antiviral medication. Treatment includes drinking lots of liquids, rest and paracetamol.

## II. Publications

H5N1 situation update as of 12 November 2009 prepared by the FAO Emergency Prevention System which includes summary of confirmed H5N1 outbreaks in affected countries.
